- (i) National Safety Committee
 - (ii) National Safety Council
 - (iii) National Safety Commission
 - (iv) National Safety Code
- (d) While monitoring air at underground works, which gas is tested first ?
- (i) Oxygen
 - (ii) Methane
 - (iii) Hydrogen Sulphide
 - (iv) Chlorine
- (e) Which class of respiratory equipment is able to provide protection against bacteria and virus ?
- (i) Particle filter class P₁ only

(ii) Particle filter class P_2 only

(iii) Particle filter class P_3 only

(iv) All of the above

(B) Explain the following in brief : $2 \times 5 = 10$

(a) Stock ladder

(b) Safety net

(c) *Three* principal ways of demolition of structure

(d) Scaffolding

(e) Induced collapse

2. (a) Describe the secondary causes of accidents.

5

(b) Enlist the *seven* basic principles to prevent accidents. Explain any *two* of them.

5

3. (a) Describe the safe practices to be followed during the use of ladders.

5

(b) Describe various safety measures to be taken while using pulleys.

5

4. (a) What is ventilation ? Discuss different types of ventilation.

5

(b) Describe accident prevention techniques in brief.

5

5. (a) Describe the essential features of a good training programme. 5
- (b) What are cranes ? Describe different types of crane in brief. 5
