

**CERTIFICATE IN MOBILE
APPLICATION DEVELOPMENT
(CMAD)**

Term-End Examination

June, 2025

BCS-094 : PROGRAMMING USING PYTHON

Time : 3 Hours

Maximum Marks : 75

Note : *Question No. 1 is compulsory. Attempt
any **three** questions from the rest.*

1. (a) What is the purpose of layouts in mobile application development ?
Explain all *five* types of Kivy layouts. 6
- (b) What are Integrity constraints ?
Explain the different types of integrity constraints with suitable examples for each. 6

- (c) What are profilers ? How do profilers differ from debuggers ? Give example for both (i.e.,) profiler and debugger. 6
 - (d) Explain the concept of overriding with suitable code in Python. 6
 - (e) Compare the execution of break, continue and pass statements with suitable example for each. 6
2. (a) What is Tkinter ? How is it different from Kivy ? Write a program in Python using Tkinter to illustrate how to work with buttons, may your code display the message 'Hello world' when the button titled 'Greeting' is pressed. 8
- (b) Briefly discuss the utility of Buildozer tool and list the steps to follow when the Buildozer tool is used on Linux. 7
3. (a) Differentiate between Batterystats and Battery historian. Give utility for both. 5

- (b) Describe the following in one or *two* lines : 5
- (i) pip
 - (ii) wheel
 - (iii) openGL
 - (iv) PyGame
 - (v) QPython
- (c) Briefly describe the term "Cross platform mobile application development". What is its use ? List any two top tools used for cross-formatting mobile application development. 5
4. (a) What is software testing ? How does verification differ from validation ? Explain with example. 5
- (b) List various testing techniques performed pre- and post-software development. 5

(c) Differentiate between the following : 5

(i) Lambda functions and Built-in functions

(ii) C and Python

5. Write short notes on the following (with example) : $3 \times 5 = 15$

(a) Blackbox testing

(b) Syntax errors

(c) Mutable data types

(d) `_init_method`

(e) Boundary Value Analysis
